To whom it may concern,

Like many people, it is with great concern that I have read about Microsoft's proposed settlement in their antitrust case. I believe the best solution would be for Microsoft to simply buy hardware that the schools themselves choose. That way, Microsoft can attempt to make amends for their business practices while giving the the school,s a genuine choice in what they use. After all, isn't that the root cause of this case in the first place, the lack of choice?

Thank you for your time and attention.
